

# What Does the Data Say? Analyzing Classroom Data

**Do Now:** Take a minute to think about data analysis. In the box below answer the following questions.

| • | Why is data analysis important?         |
|---|---|
|   | What do you want to get from your data? |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |
|   |   |

#### **Key Messages to reinforce:**

- · Quick analysis is not sufficient; analysis should go deep enough
- The most powerful insights come from question-level analysis, the paper assessments must be analyzed to develop next steps.

### **STEP 5: Saturday Shopping**

#### **Quick View Analysis:**

- "Students making a lot of errors."
- "Students are over-relying on visual cues."
- "Students are struggling to read words with igh and ee patterns. I will teach them these patterns during word work or choose books that have these patterns."

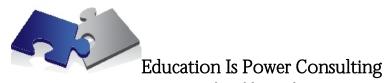

#### Analysis 2.0:

"Students are struggling to maintain stamina over longer text. They start off using multiple word-solving strategies but then as the text increases, they only use visual cues to word-solve. Until now, I have selected texts that only have half or quarter pages of text with a lot of picture support. Students need to build the stamina of reading a longer text and maintaining flexibility in word-solving. I will choose texts with whole and half pages of text and little picture support"

## **Process for Analysis**

- ÿ Choose a level to begin
- ÿ Record the DNA level, students names and bottom line on the analysis sheet
- ÿ Start by reading or reviewing the corresponding text and have it available to refer to during analysis.
- ÿ Spread all assessment sheets out to find trends at this level (remember this is not the time to look at students individually, teachers are looking for trends across the group i.e. 5 out of 7 missed question 3. Let's look to figure out why they missed it)
- ÿ Review the running record (list the students of concern= 94% accuracy and below)
- ÿ Record the type of miscues students are **missing** (Meaning-makes sense, Syntax-grammatics and structure of language, Visual-print looks visually similar)
- ÿ Reflect on why students are making these types of errors (Could it be... text selection, more variety in types of strategies, flexibility in strategy use, etc?)
- ÿ Review the comprehension conversation (list the students of concern)
- ÿ Record the sources of student misunderstanding (if teachers didn't code, have them do so now)
- ÿ Reflect on why students are making these types of errors (refer to the character codes sheet; Could it be...text selection, types of questions being asked, supporting thought with evidence etc?)
- ÿ Record students of concern for developmental spelling and phonics (notate any trends across this level, i.e. confusing i and e, final blends, 4-phoneme words)
- ÿ Reflect on a theme: What are we noticing across all of these readers?
- ÿ Reflect on next steps: Next steps should help lay a clear path to the action plan.
